

IN GENERAL, XM radio is the best thing I have ever spent money on. With the variety of programming and the lack of interruption, it is well worth the subscription price.

SPECIFICALLY, I travel quite a bit on business. It is extremely helpful for me to be able to go to the channel for the city to which I will be traveling for information on traffic and weather.

I urge you to reject NAB's petition 04-160, It is because of these broadcasters lack of quality programming that the need for a service like XM to arise. DO NOT punish XM subscribers because they opted to pay for the quality service we deserve and demand.

Sincerely,

TA Peterman
